

Cyber Risk Exposure Management for Tribal Decision-Making

Translate cyber and AI risk into financial exposure, prioritize what matters most, and reduce tribal risk with confidence.

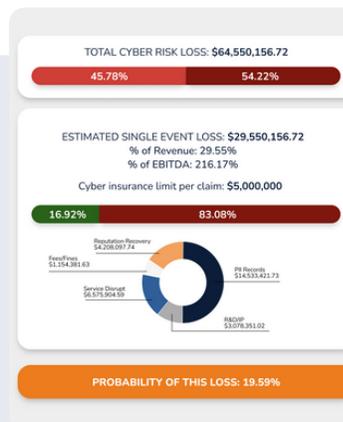

What Is Maxxsure?

Maxxsure is a **Cyber Risk Exposure Management** platform designed for **tribal enterprise operations** that translates cyber and AI-driven threats into financial exposure across your casino, government, healthcare, and community services.

The platform evaluates security controls, operational processes, governance maturity, and emerging AI threats to calculate probable maximum loss and prioritize actions that reduce the greatest financial exposure first.

Core Platform Capabilities

- **Financial Exposure Analysis:** Shows potential loss across casino, government, healthcare, and cultural programs
- **Continuous Risk Monitoring:** An end to end program that consistently refreshes to align with the tribe and what's at risk.
- **Financial Prioritized Remediation:** Identifies the actions that reduce the most financial risk
- **Tribal Council Reporting:** Board-ready visibility that show how you are doing, what's working, and where gaps remain
- **Insurance Alignment -** Ensures your cyber insurance is optimized for Tribal needs, aligned with sovereignty, and positioned for successful underwriting, so coverage matches your true risk

5 Reasons Why Your Tribe Needs Maxxsure

1. A Casino Breach Threatens **Your Entire Tribal Community**
2. **AI-Driven Attacks** Have Changed the Game
3. Interconnected Systems Create **Cascading Risk**
4. Tribal Councils **Demand Financial Clarity**, Not Technical Scores
5. Tribal Sovereignty Requires **Sovereignty-Aware Solutions**
